

Location

The course will take place at the Kiklukh Lodge, southeast of Anchorage, Alaska. This will allow an opportunity to participate in a post graduate educational experience and appreciate the beauty and opportunities of the locale.

This will include salmon fishing and the course will be held during the silver salmon run. The lodge sits on a bluff overlooking the Kiklukh River, Gulf of Alaska. There are three mountain ranges behind the lodge with the Bering Glacier in between. Icebergs can be seen commonly on the beach. Many wild animals including brown and black bear, moose, wolves, mountain sheep, eagles and other wild fowl are commonly seen. Local arrangements can be made through:

Subspecialty Pearls for the Nonspecialists

September 7 ~ September 14, 2018
Kiklukh Lodge, Alaska

Course Description

This is the sixteenth annual “Subspecialists Pearls for the Non-specialist”. The course will allow an opportunity for the attendees to obtain important patient related information from nationally and internationally recognized leaders in their fields. This will be done in an informal setting in which one on one contact is emphasized. Registration fee is \$300. Attendance is limited to lodge accommodations.

William Creasman, MD, Course Director

Learning Objectives

At the conclusion of this activity, participants should be able to:

- ◆ Identify the problem patient;
- ◆ Review causes and treatment of dyspareunia;
- ◆ Understand the causes of ovarian cancer;
